Presents to you our **Wireless Network Security Tech-Know Workshop**

Security on wireless networks has become a subject of hot debate. How does one secure a wireless LAN if WEP is supposed to be so insecure? Come find out at our Tech-Know Workshop focused on Wireless Network Security.

This presentation will be given by Joel Helgeson, one of the networking industries leading consultants. Joel will be discussing his involvement in securing the wireless networks of major companies, from the labs of a large pharmaceutical giant, to the trading floor of a major commodities exchange.

We will show you that wireless networks can be secure and introduce you to SymetriQ's \$10,000 Wireless Security Challenge.

Presenter: Joel R. Helgeson
SymetriQ's Director of Networking and Security Services

Joel has over 10 years of experience in Network Security, Voice over IP, Local Area, Wide Area and Wireless Networking. Joel is one of the networking industry's leading technology and security consultants.
